

AZTECA RESTAURANT

5,800 SqFt RENOVATION
Completed March 2004
Charlotte, NC

AZTECA RESTAURANT

This project was a 5,800 square foot interior build-out for restaurant tenant space in an existing retail center in Charlotte. The restaurant was comprised of kitchen area, bar area, central dining and restroom facilities. The project incorporated broad arches with custom handmade Mexican adobe tile, in laid in faux stuccoed interior walls designed to reflect the feeling of an authentic cantina environment. The flooring included custom patterned carpeting throughout the dining space with epoxy coatings in the kitchen. The plumbing fixtures (custom hand painted porcelain sinks) were hand selected and imported from Mexico. The dining area included a wide variety of accent lighting to highlight the owner's authentic Mexican furnishings. The bar area contained custom millwork including additional hand made inlaid adobe tiles within the wood. The project was completed in eight weeks.
