

## STUDENT ACTIVITY CENTER

CENTRAL PIEDMONT  
COMMUNITY COLLEGE

**6,600 SqFt** RENOVATION  
Completed March 2006  
Charlotte, NC

### CPCC STUDENT ACTIVITY CENTER

The project involved creating a focal lobby in the existing Student Services Center Building. The building was originally built in the 1920's and had undergone four or five previous renovations. Hendrick was required to come in, completely demolish all of the old systems and install the focal point reception area during the school's summer break. The area had to remain open during the construction for ongoing summer activities. Custom demising systems and temporary walls had to be constructed to divert the foot traffic. The central reception desk was custom built on site and contained a mirrored ceiling soffit that matched the shape of the reception desk. The surrounding walls contained custom millwork paneling and wall covering.
