

HAWTHORNE ALTERNATIVE SCHOOL

7,000 SqFt DEMOLITION/RENOVATION
Completed April, 2005
Charlotte, NC

HAWTHORNE ALTERNATIVE SCHOOL

This project was a renovation to create a child care facility. Extensive concrete slab cuts were necessary in order to allow for plumbing chases. Also, selective twelve inch concrete masonry units were removed in order to allow for the installation of a new exterior. ADA ramps and rails were added to bring the project up to code. Custom millwork designed to house infant bathing sinks as well as storage cabinets were also included in the retrograde. New rest-rooms, offices and a reception area with storefront glass systems were also upgraded.
