

MECKLENBURG COUNTY JAIL NORTH ANNEX

81,500 SqFt NEW CONSTRUCTION

Projected Completion October 2008

Charlotte, NC

MECKLENBURG COUNTY JAIL

This project began in March 2008 and is scheduled for substantial completion in October. The facility will offer seventy one thousand square feet of jail space with an additional ten thousand five hundred square feet administration building. The unique building approach involves a "Sprung" structure, an innovative alternative to conventional construction utilizing architectural membrane panels placed under high tension within a non-corroding aluminum substructure. This design offers an innovative relocatable building alternative designed for diverse semi-permanent and permanent needs throughout our area and will allow our client to receive over forty six thousand square feet of usable space in less than one hundred and eighty days.
