

REGIONAL HEADQUARTERS and CALL CENTER

22,000 SqFt NEW CONSTRUCTION
Completed August 2007
Lancaster, SC

KENNAMETAL

This twenty-two thousand square foot facility was home to Kennametal's new state of the art call center and corporate offices. The ground up assembly incorporated a pre-cast paneled wall system constructed on a structural steel skeleton which offered our client limitless possibilities for finish selections and versatility. A specialty security system was installed as well as back-up generators for loss of power. The exterior design included anodized aluminum storefront glass accompanied by an architectural cornice wrapping the entire footprint of the building. The interior integrated high-end carpets with slate tile, custom casework and specialty textures.
