

SAM ASH MUSIC STORES

20,000 SqFt INTERIOR RENOVATIONS
Completed 2003-2004
Charlotte and Raleigh, NC

SAM ASH MUSIC STORES

These two projects for Sam Ash Music included the renovation of existing 20,000+ square-foot steel and masonry structures to customize them for the needs of a retail music store. In addition to the surgical removal of previous tenant fixtures, upfit work included service and maintenance of existing rooftop units and air distribution systems, identification of existing electrical receptacles and lighting and power distribution. The space also required the upgrade of life safety components, specifically sprinkler heads, fire extinguishers and Knox Box. Over 150 sheets of slat walls were incorporated for product display. Among the required specialty items for the retail music store were "Rubbar" doors with cased openings, corner guards, televisions with wall-mounted surveillance, custom paint schemes and racking.
