

STOCKBRIDGE COMMONS

10,000 SqFt NEW CONSTRUCTION
Completed December 2006
Tega Cay, SC

STOCKBRIDGE COMMONS

This 10,000 square foot shell building offered six vanilla tenant spaces built to suit upon lease. It included brick veneer and hardiplank siding, rubber roof membrane with parapet walls, pre-finished metal coping with aluminum storefront and glass and fabric canopies with aluminum frames. The site plan required exterior side-walks, curb and gutter and landscaping. The project took only fourteen weeks to complete from beginning to end.
