

WALGREENS STORES

14,000 SqFt NEW CONSTRUCTION
Completed 2008-09
Charlotte / Winston Salem / Wesley Chapel, NC
Rock Hill / Lancaster, SC

WALGREENS STORES

These projects consisted of ground up structures constructed in various retail centers in North and South Carolina. The 14,000 square foot buildings are comprised of retail floor space pharmacy area, storage, offices and public facilities. The exterior of the buildings vary to fit the design and style of each retail center. However, many of the Walgreens prototypes include custom brick veneer, Arrisfat stonework, metal canopies with custom lighting and signage and windows showing the view to the sales area. The interior is comprised of acoustical ceilings and lighting to match the fixturing layout. The interior also includes many special systems including security and surveillance, custom IT integration and material delivery systems. The drive-thru pharmacy area integrates many of the above systems in addition to specialized millwork and cash wrap systems. The projects are typically completed within 8-10 months, depending on each unique site condition.
